CHOOSING OUR STOCKS:

Allocation Strategy: 60% Growth Stocks, 30% Defensive, 10% Wildcards

Growth Stocks typically come from companies expected to have incredible growth in the future e.g Electric Vehicles like TESLA and cloud-based business. In terms of Malaysia, you can look at VSURE, cloud-based insurance. Also clean energy firms.

Defensive stocks are those that are resistant to any economic changes. Think of your local grocery store. Even if inflation strikes or recession, you will always need to eat the same amount of food. These also include health and pharmaceuticals like Watsons.........

Wildcards>> getting the edge on the competition! Look at market disrupters like

To Find ESG inclined Stocks under these categories, use **FTSE4Good Bursa Malaysia Index**
FTSE4Good Bursa Malaysia (F4GBM) Index

Note: stocks used here are for reference and not exhaustive.

Growth Stocks	Defensive Stocks	Wildcard Stocks
> Solarvest Holdings Bhd- solar engineering & RE deployment >Samaiden Group Bhd- Renewable energy EPC >Inari Amerton Bhd – Semiconductor player >ViTrox Corporation Bhd – Machine vision systems	>Maybank for obvious reasons(stability) >Tenaga Nasional Bhd >Matrix Concepts- construction	>Cypark Resources Bhd – first ever developer of clean energy >VSURE Insurance- first ever 100% virtual insurer >Farm-fresh Bhd- sustainable agriculture > AEON Co.(M) Bhd- retail with strong social governance and community impact

OUR Approach to decision making:

Analyse all 5 top picks in each category:

- Look at returns
- Look at volatility
- ESG policy strength
- How easily can we get news on it

  Next thing is coming up with a scoring for each measure to make it easier to decide and justify. What’s your take?
